CHARGING THE FUTURE

7 September 2016

Important Notice and Disclaimer

Representations

No person is authorised to give any information or to make any representation in connection with lithium Power International Limited (LPI or Company) or the offer which is not contained in this presentation. Any information or representation not so contained may not be relied on as having been authorised by the Company.

Not a disclosure document

The provision of this presentation does not require a disclosure document to be lodged with ASIC under Part 6D of the Corporations Act. Nor does the provision of this presentation require a product disclosure statement or similar document required under Chapter 7 of the Corporations Act. No formal disclosure document (within the meaning of the Corporations Act) has been or will be lodged with ASIC in connection with this presentation.

Accordingly, this presentation does not contain the information that would be contained in a prospectus or other disclosure document prepared under the Corporations Act and does not purport to contain all the information that may be necessary or desirable to enable a potential investor to properly evaluate and consider an investment in the Company.

Presentation is not Advice

The provision of this [presentation] is not and should not be taken as a recommendation in relation to an investment in the Company or that an investment in the Company is a suitable investment for the recipient of this [presentation].

This [presentation] does not purport to constitute any advice whatsoever, but to the extent it does, it constitutes only general advice (within the meaning of section 766B(4) of the Corporations Act) and does not take into account your individual investment objectives, financial situation or particular needs. It does not contain personal advice. The Company recommends prospective investors seek independent financial and taxation advice before making a decision as to whether or not to apply for shares.

Competent Person's Statement

The information contained in this ASX release relating to Mineral Resources has been compiled by Mr Murray Brooker. Mr Brooker is a Geologist and Hydrogeologist and is a Member of the Australian Institute of Geoscientists and has sufficient relevant experience to qualify as a competent person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. He is also a "Qualified Person" as defined by Canadian Securities Administrators' National Instrument 43-101. Murray Brooker consents to the inclusion in this announcement of this information in the form and context in which it appears. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

Not an Offer in certain jurisdictions

The provision of this [presentation] may not be distributed nor may shares be offered for sale in the United States of America or any country in which it would be unlawful to do so.

Prospective investor to conduct own investigation and analysis

Prospective investors should carry out their own independent investigations and analysis of the Company and the information referred to in this [presentation] and other matters that may be relevant to it in considering whether to acquire the shares. Each prospective investor considering an investment in the shares must make, and will be taken to have made, its own independent investigation and analysis of the information provided in this [presentation]. Independent expert advice (including from a prospective investor's accountant, lawyer or other professional adviser) should be sought before making a decision to invest in the Company.

No responsibility for contents of [Presentation]

To the maximum extent permitted by law, no representation, warranty or undertaking, express or implied, is made and, to the maximum extent permitted by law, no responsibility or liability is accepted by the Company and its advisers or any of their officers, employees, agents or advisers or any other person as to the adequacy, accuracy, completeness or reasonableness of the information contained in this [presentation]. To the maximum extent permitted by law, no responsibility for any errors or omissions whether arising out of negligence or otherwise is accepted.

Projections and forecasts may not be accurate

The provision of this [presentation] may contain forward looking statements, which are based on subjective estimates and assumptions and about circumstances and events that have not yet taken place. Such estimates and assumptions involve significant elements of subjective judgement and analysis, which may or may not be correct. Accordingly, no representations are made by the Company, its related parties, consultants or advisers as to the accuracy of such information and there can be no assurance that any projected result would be achieved.

No contract

The provision of this [presentation], including any update or supplement to it, does not and will not form part of any contract for the subscription for shares in the Company that may result from the review, investigation and/or analysis of the shares or the Company, by a prospective investor.

ACN 607 260 328

Avenue El Golf 40, Piso 20, Las Condes, Santiago, Chile

Avenue Santa Fe 1592 - 4º piso (C1060 ABO), Buenos Aires, Argentina

Lithium Power International – A Diversified Pure-Play Lithium Company

Key attributes for LPI

- Pure-play lithium explorer & developer, which is diversified by geography and deposit type (hard rock & brine).
- Exploration targets identified across our project regions in Western Australia and South America. All project areas are close to critical road, rail, and port infrastructure.
- An experienced Board with extensive mining and commercial experience, with highly-qualified technical experts in both Australian and South America.
- Strong lithium market fundamentals driven by worldwide battery demand.

Key points for Maricunga JV

- LPI has completed legal & technical due diligence on the formation of a JV to develop the world class Maricunga lithium brine project, together with the current owners Minera Salar Blanco (MSB) and Minera Li (51%-controlled by MSB, and 49% Li3 Energy).
- Maricunga is regarded as the highest grade pre-production lithium project in Chile – with characteristics comparable to the world-leading Atacama deposit. Exploration drilling will commence later this month, aimed at expanding the existing 43-101 resource base.
- Maricunga is located within the “Lithium Triangle” in northern Chile, close to road & port infrastructure, and within a known pro-mining province of Copiapo.

LITHIUM POWER INTERNATIONAL (LPI) WAS ESTABLISHED TO ACQUIRE HIGH-QUALITY LITHIUM TENEMENTS IN AUSTRALIA AND SOUTH AMERICA

THE COMPANY COMPLETED A SUCCESSFUL IPO ON ASX IN JUNE 2016, FOLLOWING A HEAVILY OVERSUBSCRIBED OFFER PERIOD

Lithium Power - Board and Technical Team

Mr Ricky P Fertig

Chairman

Founding director and senior executive with 30yrs of international commercial experience across property, healthcare, and mining services sectors.

Mr Murray Brooker

Group Technical & Exploration Adviser

Geologist specialising in lithium, with 20yrs experience in lithium prospecting and exploration. Most recently, he was the JORC Competent Person to Orocobre on their lithium brine project in Argentina.

Mr Martin C Holland

Chief Executive Officer

Founder and CEO with 11yrs management experience focused on the mining exploration sector. Previously CEO of gold explorer Stratum Metals from 2010 to 2014, which listed on ASX in 2011.

Mr Stuart Peterson

Exploration Manager – Hard Rock

Hard rock pegmatite geologist with spodumene lithium experience. Most recently, the Senior Geologist with Mineral Resources on their Mt Marion lithium project in Western Australia.

Dr Luis Ignacio Silva P

Director and Regional Manager Latin America

Mining geologist with 40yr experience in Sth America, including the last 10yrs as a lithium specialist. He has worked with Talison, Freeport, Amax, Barrick, Homestake, Rio Tinto, Shell-Billiton, Pegasus, CNC, and SERNAGEOMIM.

Mr Todd Axford

Independent Expert – Hard Rock

Completed the IER in regards to all the Australian hard rock tenements and applications. Senior geologist with 21yrs experience. Previously held exploration positions at: Stratum Metals, Australasian Resources, Mt Gibson Iron, and Cliffs Natural Resources.

Mr Andrew G Phillips

CFO and Company Secretary

Over 25yrs of commercial experience. Company Secretary (and previous CFO) for Sequoia Financial, and Independent Director of: Richfield Intl, Longreach Oil, and Southern Cross Exploration. Held previous senior management roles with Aristocrat, Allianz, and Hoya Lens.

Dr Mark King

Independent Expert - Brine

Completed the IER for LPI's brine tenements in Chile and Argentina. Expert in hydrogeology with technical advice provided on over 100 projects across the Americas.

A photograph of a Tesla Supercharger station. In the foreground, a white charging station with a red cable is visible. The word "TESLA" is printed in red on the top of the station. In the background, a dark blue Tesla Model S is parked, with its charging cable plugged into the rear. The scene is outdoors, with green foliage and a building in the background.

TESLA

Lithium Market & Outlook

Lithium is charging the future...

- Lithium-ion batteries are the preferred choice for portable energy storage given the combination of:
 - ✓ light weight
 - ✓ high energy density
 - ✓ slow self-discharge
 - ✓ low maintenance
 - ✓ low environmental risk

“Lithium is the new gasoline”

“Lithium is now considered a key, strategic energy metal...”

“...within 30 years, a majority of new cars made in the United States will be electric”

“Given the continued growth in Electric Vehicles, lithium carbonate prices are expected to increase over the forecast period...”

The key growth for lithium is car batteries, particularly in China

- According to CRU, total global lithium demand across all applications is forecast to grow at +8% pa (CAGR) over the next 5 years to 2020.
- Last year, 44% of global lithium consumption was for lithium-ion rechargeable batteries, with demand expected to grow at +13% pa in this segment over the next 5 years.
- Within battery demand, growth in electric & hybrid vehicle batteries is expected to grow at +23% pa over the next 5 years.
- The main driver of this EV/HEV/PHEV growth is China, which represents >50% of global battery production capacity.

Source: CRU

Lithium prices continue to rally, driven by strong demand

- A combination of strong demand and supply interruptions has resulted in the Chinese lithium price rallying from ~US\$5,000/t in mid 2015 (contract) to >US\$20,000/t currently (spot).

Source: CRU, GTIS, Asian Metal

The fundamentals for lithium are strong in the medium term...

- Based on CRU's forecasts, the supply/demand balance for lithium will continue to remain tight over the next 5 years.

Source: CRU

A wide-angle landscape photograph of the Maricunga Lithium Project. The foreground is filled with tall, golden-brown grasses. In the middle ground, a large, dark brown body of water (likely a lithium brine pond) stretches across the frame. A prominent, irregularly shaped white salt flat or island is visible in the center of the pond. The background features a range of brown, arid mountains under a clear, deep blue sky.

Maricunga Lithium Project

Maricunga Lithium Brine JV – Project Overview

- The Maricunga Salar is located in northern Chile and sits within the “Lithium Triangle”, which contains the largest and highest quality lithium brine deposits in South America.
- Maricunga is regarded as the highest quality pre-production lithium brine project in Chile, with characteristics comparable to the world-leading Atacama lithium brine deposit (which sits at the bottom of the global lithium cost curve).
- Maricunga has a measured resource of more than 574,000 tonnes of lithium carbonate, at a very high grade of 1250mg/l (NI 43-101 basis). It also contains 1,500,000 tonnes of potash. Together, this would support a 20yr+ expected mine life (at 15ktpa).*
- Maricunga is located in Region III of Atacama in northern Chile. It is approx 170km NE of the mining town of Copiapo.
- In terms of infrastructure access, Maricunga is directly adjacent to International Highway 31, which connects northern Chile and Argentina, and 250km from the Chilean coast.

* NI 43-101 amended report dated 23rd May 2012

Maricunga – One of the highest quality lithium salars in South America

- Known resource containing lithium carbonate (574kt) and potash (1.5mt), based on previous exploration*.
- An additional 1125 Ha of new tenements now under exploration.
- Second highest lithium grade (1250mg/l) of the major producing salars in South America*.
- Magnesium grade below the Atacama deposit, with a similar Mg/Li ratio.*
- High potash byproduct resulting in improved project economics.
- Close to critical road & port infrastructure.
- Recent study of 37 salars ranked Maricunga as #7 salar worldwide^.
- Chilean Geological Survey has classified Maricunga as a Category 1 deposit (one of only four in Chile).

	Salar de Maricunga¹	Salar de Atacama²	Salar de Centenario⁴	Salar Del Hombre Muerto²	Salar de Olaroz²	Salar de Cauchari³
Country	Chile	Chile	Argentina	Argentina	Argentina	Argentina
Owner	LPI/MSB	SQM/Albemarle	LPI/Eramet	FMC/Lithium One	Orocobre/Toyota	Orocobre/SQM/Lithium Americas
Lithium (g/l)	1.25	1.84	0.56	0.74	0.69	0.59
Potassium (g/l)	8.97	22.63	5.11	7.40	5.73	4.85
Magnesium (g/l)	8.28	11.74	3.26	1.02	1.66	1.42
Mg/Li	6.63	6.40	5.87	1.40	2.40	2.43
K/Li	7.18	12.33	9.20	9.95	8.30	8.30
K/Mg	1.08	1.93	1.57	7.26	3.46	3.58

(1) NI 43-101 amended report prepared for Li3 Energy Inc. dated 23 May, 2012

(2) NI 43-101 report prepared for Orocobre Ltd. dated 13 May, 2011

(3) NI 43-101 report prepared for Lithium Americas Corp. dated 11 July, 2012

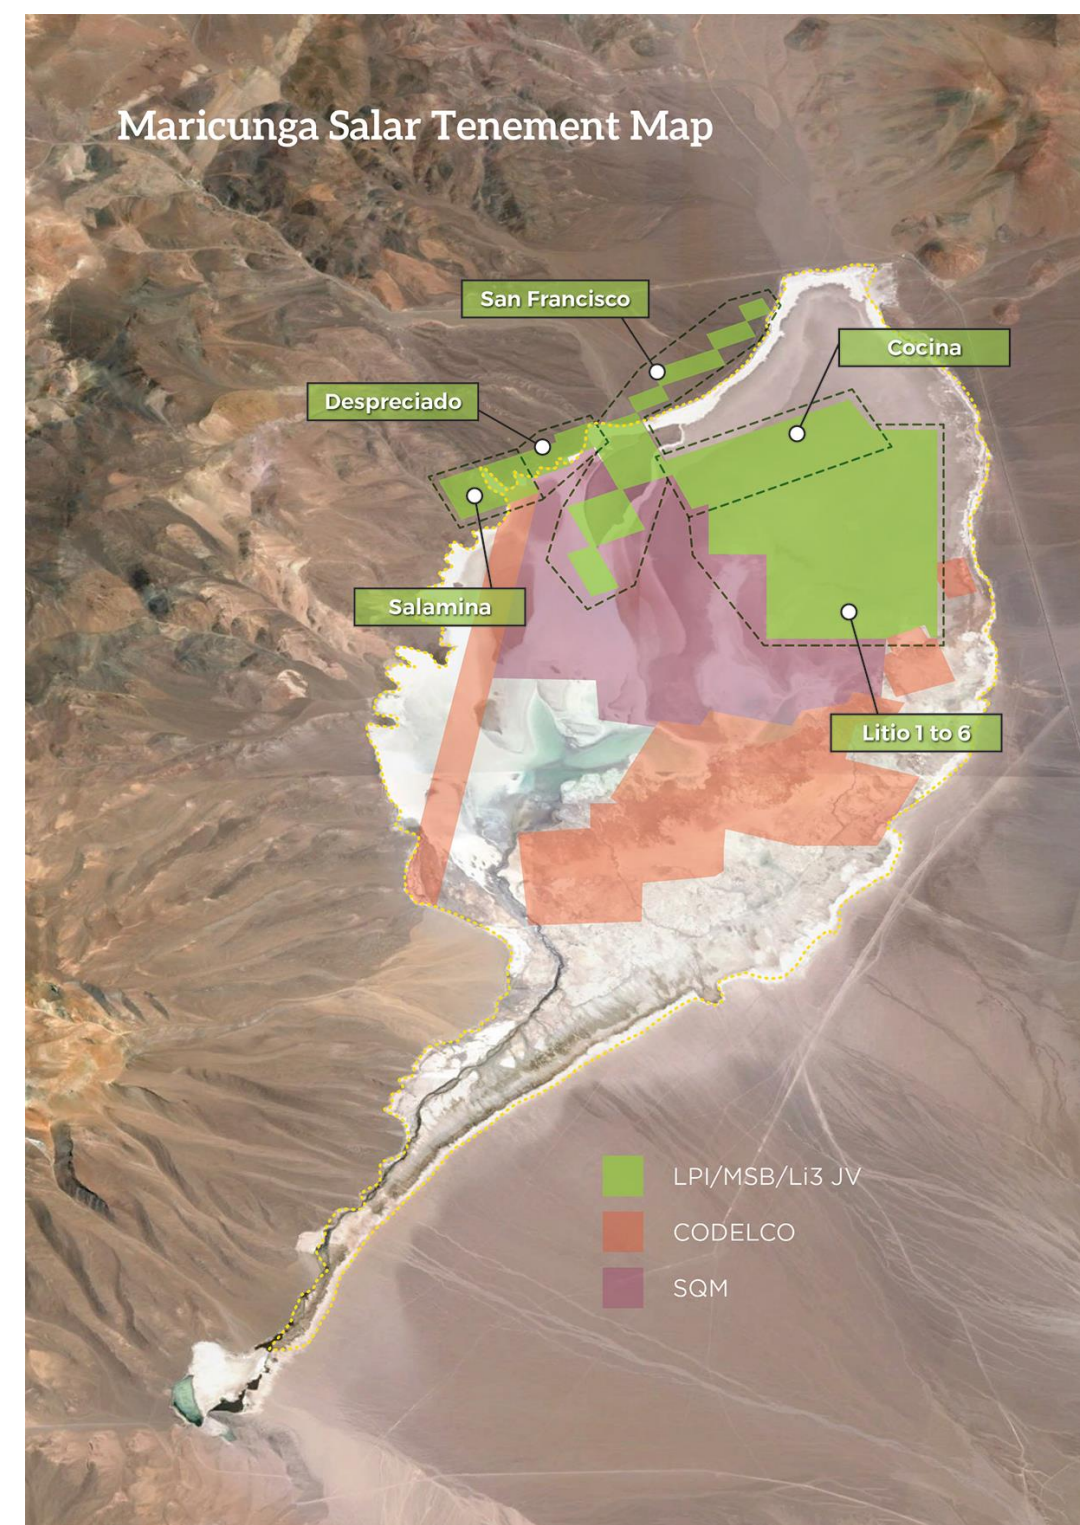

(4) S area – from Lacus preliminary resource estimate (which is outside of LPI tenements) dated Jan/Feb 2012

Maricunga Lithium Brine JV - Tenement Map

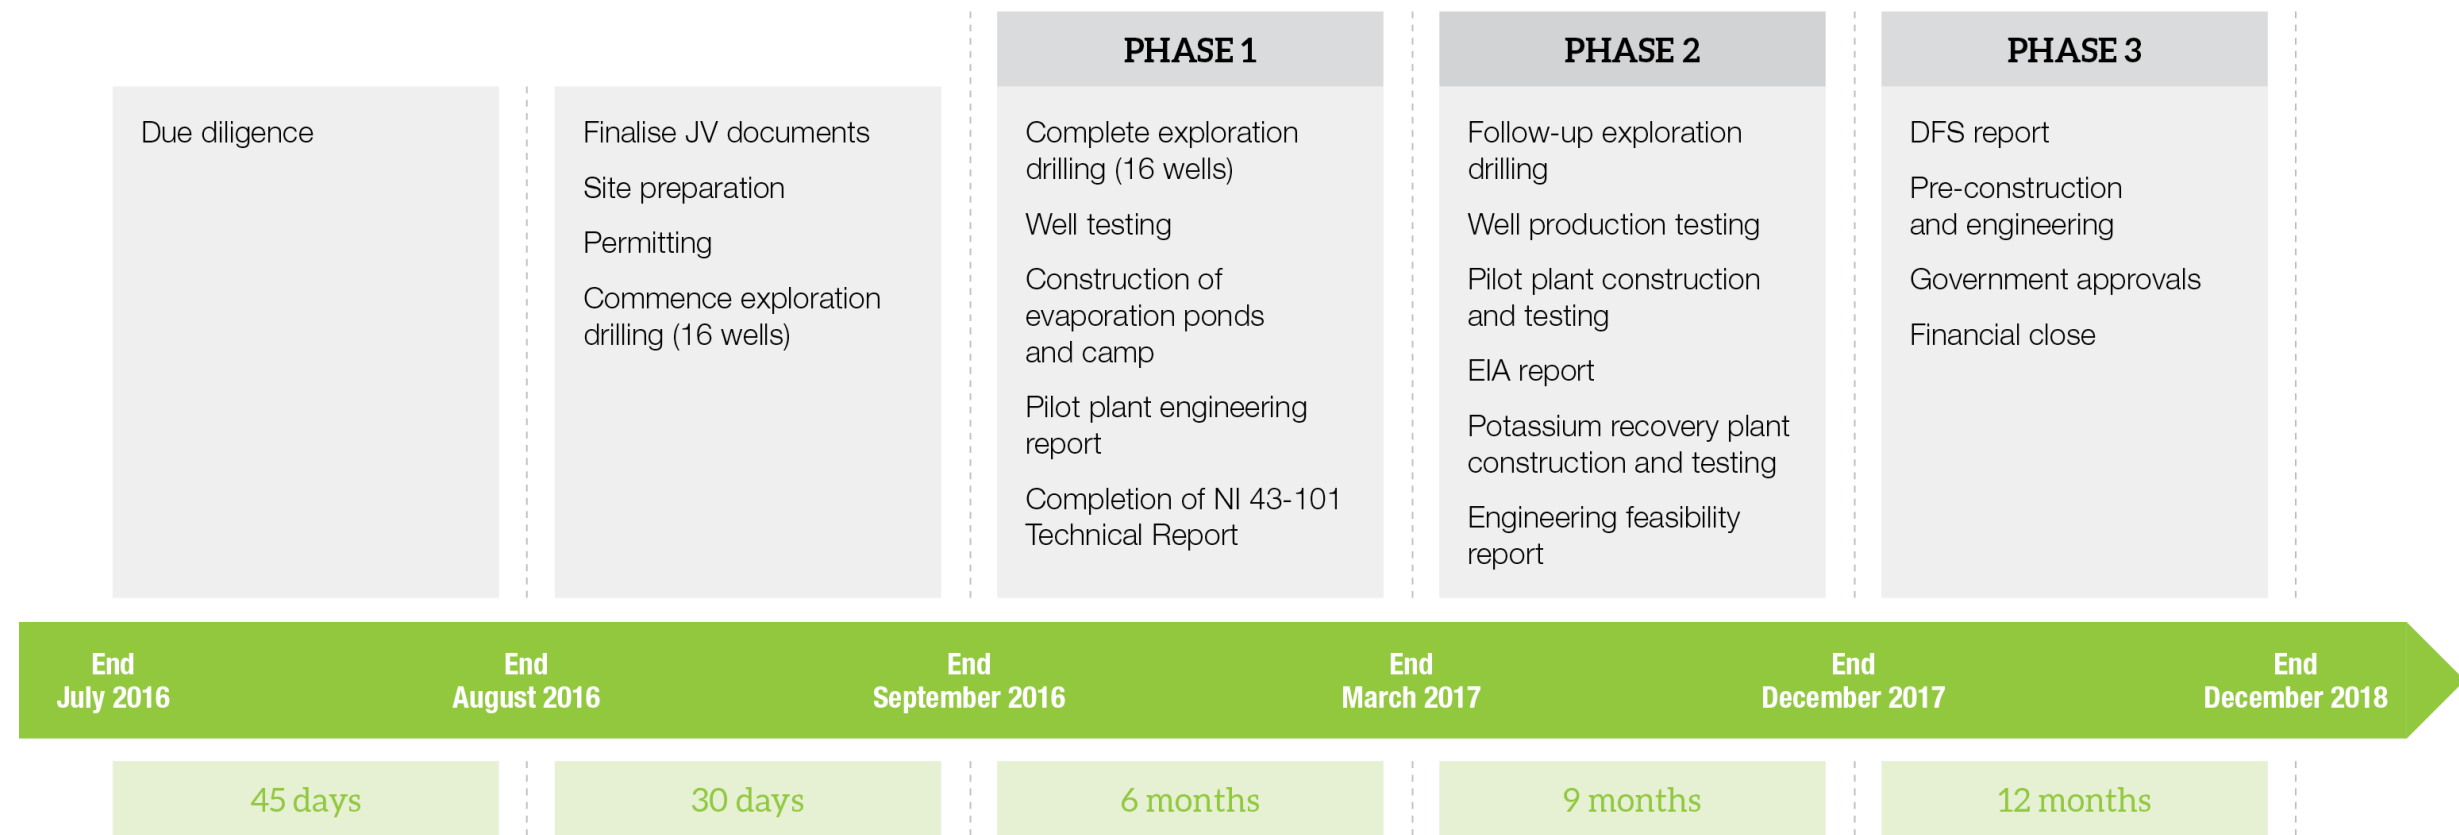

- The JV tenements consist of a collection of holdings in the northern (lithium-rich) section of the Maricunga salar:

Tenement	Code	Size	Vendor
San Fransisco	1932	425 Ha	LPI
Salamina	1932	150 Ha	LPI
Despreciada	1932	100 Ha	LPI
Cocina 19–27	1932	450 Ha	MSB/Li3
Litio 1–6	1982	1438 Ha	MSB/Li3
Blanco	n/a	1800 Ha	MSB/Li3
Camp1	n/a	100 Ha	MSB/Li3

- The Maricunga Salar has been subject to significant past exploration under the previous partners, MSB and Li3. More than US\$30m has been invested in these tenements over the past 4yrs, in order to generate the existing lithium resource.
- Under the new JV, the next phase of exploration will include the drilling of 16 diamond drill holes and 2 pumping wells across the salar, starting later this month. This drilling program is targeting an upgrade of the existing lithium resource, with a new JORC report anticipated in 1H 2017.

Maricunga Lithium Brine JV – Development Timeline

Lithium Brines in South America – Lowest On The Cost Curve

- While difficult to directly compare lithium brine vs hard-rock, we can make the following broad observations:
 - ✓ Brines are typically easier & cheaper to explore.
 - ✓ Brines are typically cheaper & quicker to develop to production (depending on permits).
 - ✓ Brines require less opex once in production, and see less cost volatility.
 - ✓ Brines can be purified onsite to >99% lithium, while hard-rock production is sold as beneficiated ore.
 - ✓ Brines have historically been preferred by battery manufacturers.
 - ✓ Brine operations are generally regarded as having less environmental impact over time.
- For the reasons above, South American lithium brines inhabit the bottom of the cost curve, as can be seen below:

Maricunga Lithium Brine JV – Structure

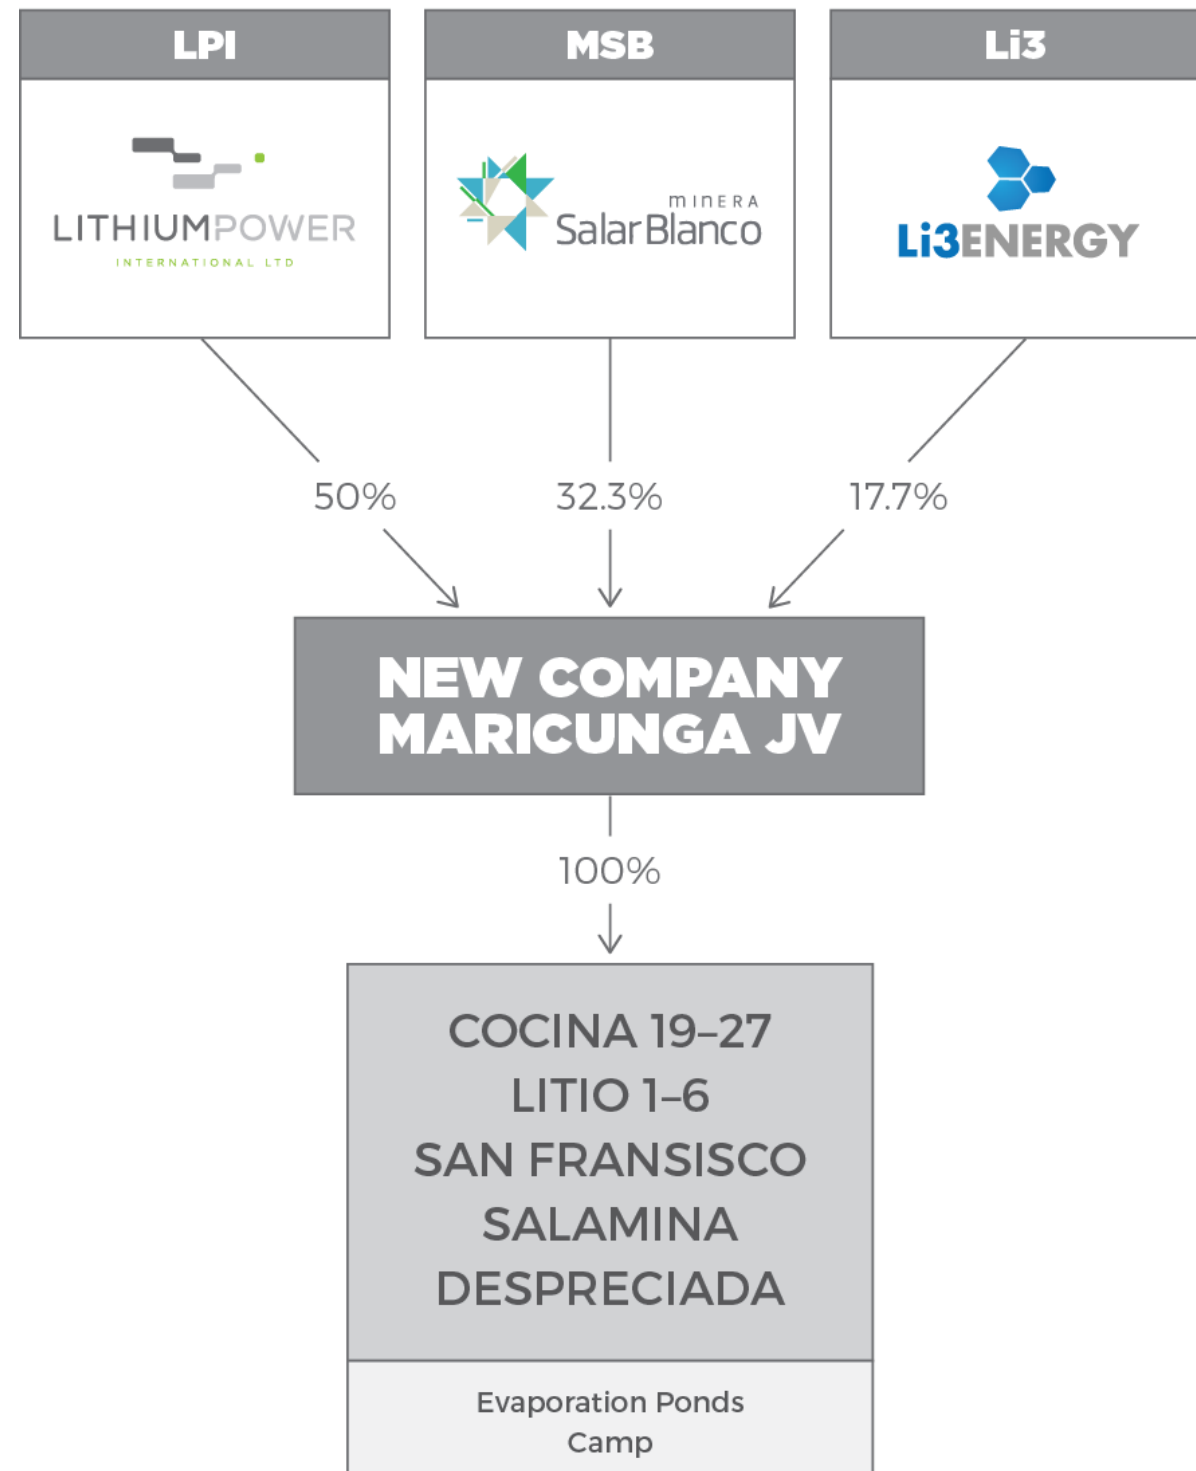

- LPI, MSB and Li3 have agreed the following ownership structure for the new JV entity in Chile (“NewCo”):

Lithium Power - 50.0%

Minera Salar Blanco - 32.3%

Li3 Energy - 17.7%

- NewCo will contain all Maricunga tenements and assets held by the three parties. Final JV contracts will be completed and signed shortly.
- LPI to fund exploration and development costs over the next 2.5yrs to earn its 50% equity interest in NewCo, with the target of completing a Definitive Feasibility Study by late 2018. LPI will hold 50% voting rights from the start of the JV.
- The Board and Technical Committee for NewCo will be split between LPI, MSB and Li3 from the outset, based on each company’s respective shareholding in the Maricunga JV.

Lithium Power - Capital Structure

Capital Structure (as at 6th September 2016)

ASX Code	LPI
Shares outstanding	111.7m*
Options	31.3m^
Share price	A\$0.315
Market Capitalisation (undiluted)	A\$35m
Cash on Hand	~A\$7m

Substantial Shareholders

FOUNDERS & DIRECTORS*	48.0%
JP MORGAN NOMINEES	5.6%

* 51m shares (45% of total) are escrowed until 24 June 2018

^ 95% of options on issue are escrowed until 24 June 2018
